Understanding the sociomaterial boundary qualities of livelihood resilience to climate change: Toward a methodological framework for more systematic social analysis

Christopher Lawless

February 2015
This paper is part of a set of working papers that resulted from the Resilience Academy 2013-2014. United Nations University Institute of Environment and Human Security (UNU-EHS) publishes these papers as part of its UNU-EHS Working Paper series.

**Series title:** Livelihood Resilience in the Face of Global Environmental Change  
**Paper title:** Understanding the sociomaterial boundary qualities of livelihood resilience to climate change: Toward a methodological framework for more systematic social analysis  
**Authors:** Lawless, C.  
**Publication date:** February 2015

**This paper should be cited as:**  
Livelihoods are the lattice upon which all human organization hangs, and some of the worst-case scenarios of global change – displacement, migration, conflict and famine – all centrally concern the problems that people face in sustaining productive livelihoods.

The 2013-2014 Resilience Academy is a group of 25 international researchers and practitioners who have recognized that dangerous global change is a threat to the livelihood systems of the world’s poor. The Academy met twice, in Bangladesh and Munich, Germany, and developed a set of working papers as an evidence base for the concepts and practices that we, as a cohort of colleagues, propose for addressing this pressing challenge.
Maintaining and building ‘place’ through managed and forced community relocations: Lessons for a climate changed world

Helen Adams, Ryan Alaniz, Robin Bronen and Karen McNamara

February 2015
