Investing in children to prepare for disasters

by Raju Joshi

While disasters disrupt children’s access to education, nutrition, and health care, among other basic needs, a new approach recognizes children’s capacity to be agents of their own recovery, helping themselves and their communities.

No need for luck to survive: Why we should care about children

by Laxmi Prasad Bhattarai

The 2016 Nepal earthquake shocked the children of the Khotang district to their core. They had to flee their homes, sometimes from one side of the street to another. The children are now learning to be agents of their own recovery, helping themselves and their communities.

Disaster Risk Reduction

by Ramesh Shrestha

The 2016 Nepal earthquake and the subsequent floods in 2017 have highlighted the need for better disaster risk reduction strategies. This article explores the role of children in disaster risk reduction and the lessons learned from the Nepal earthquakes.

REDDING THE IMPACTS

Bangladesh’s contribution to the climate change solution

by Anjana Nandi
