

Project Summary:
**Mainstreaming Biodiversity Conservation and Sustainable Management in
Priority Socio-ecological Production Landscapes and Seascapes**

Shorthand name:	GEF-Satoyama Project
Project Duration:	September 1, 2015 – June 30, 2019 (46 months)
GEF Project Agency:	Conservation International
Executing Agencies:	Conservation International Japan (CI Japan; lead), with United Nations University Institute for the Advanced Study of Sustainability (UNU-IAS) and Institute for Global Environmental Strategies (IGES)
Funding:	GEF: USD1,909,000 / Co-financing: USD6,350,000

I. Project Vision

Society in harmony with nature, with sustainable primary production sector based on traditional and modern wisdom, and making significant contributions to global targets for conservation of biological diversity.

II. Project Objective

To mainstream conservation and sustainable use of biodiversity and ecosystem services, while improving human well-being in production landscapes and seascapes.

III. Project Components

The Project is consisted of the following interrelated, mutually-informing components.

Component 1: “On-the-ground demonstration”. Enhancing livelihood, conservation and sustainable use of biodiversity and ecosystem services through investing in demonstration projects (Lead: CI Japan)

Outcome 1.1: Effective conservation management in selected priority production landscapes and seascapes achieved.

Outcome 1.2: Site-level conservation status of globally threatened species improved.

Outcome 1.3: Traditional knowledge benefiting and being protected in conservation measures.

Component 2: “Knowledge generation”. Improving knowledge generation to increase understanding, raise awareness and promote mainstreaming biodiversity in production landscapes and seascapes (Lead: IGES)

Outcome 2.1: Global knowledge on “socio-ecological production landscapes and seascapes” (SEPLS) for mainstreaming biodiversity conservation and sustainable use into primary production landscapes and seascapes enhanced.

Component 3: “Capacity-building workshops and trainings”. Improving inter-sectoral collaboration and capacities for maintaining, restoring and revitalizing social and ecological values in priority SEPLS (Lead: UNU-IAS)

Outcome 3.1: Capacity of multi-sectoral stakeholders, including national and international decision-makers, practitioners and under-represented groups, to collaborate and mainstream biodiversity conservation and sustainable management increased.

IV. Compliance, Monitoring and Evaluation

The Project will remain compliant with CI-GEF Project Agency’s Environmental and Social Management Framework, including the Stakeholder Engagement Plan and Gender Mainstreaming Strategy and Action Plan, and follow the Monitoring and Evaluation Plan.
