

CLIMATE ACADEMY

PEOPLE'S PATHWAYS TO CLIMATE ACTION

WEBINAR ON

Nature-based Solutions – application,
challenges and way forward

Supported by the "People's Pathways to Climate Action – the Climate Academy" programme

01 October 2021

Organized by

UNITED NATIONS
UNIVERSITY
UNU-EHS

Munich Re
Foundation
From Knowledge
to Action

In cooperation with

In this concluding event, we aim to showcase concrete action items that can enhance the effective implementation of NbS in urban areas to reduce climate change vulnerability. Starting with the role of the private sector and how certain market-driven tools can be adopted to this end, we will present the wish list of our experts as well as the key findings from the entire webinar series.

Any solution can only go so far without bringing the most vulnerable sectors of society on board. In this event we will have a particular focus on gender and social vulnerability and will share ways to ensure effective participation. We aim to conclude this series with key recommendations for enhanced implementation of NbS in addressing climate change vulnerabilities and will present specific recommendations for UNFCCC COP26 from this perspective.
