## WEATHER

The weather in Dar es Salaam is warm and humid year round with some humidity off-set by the Indian Ocean breeze. Rainfall can happen any month but the heavy rains fall from mid-March to May and November to January.

## ELECTRICAL SUPPLY

Voltage in Dar es Salaam is 250V, 50 cycles, AC network.

## FLIGHT INFORMATION

Please send us your final itinerary by **20 February 2014** to make your accommodation and Airport transfer arrangements.

The United Nations University Institute for Integrated Management of Material Fluxes and of Resources (UNU-FLORES) was established in Dresden, Germany in 2012 with the support of the Federal Ministry of Education and Research (BMBF) and the Ministry for Higher Education, Research and the Arts (SMWK) of the Free State of Saxony, Germany. As part of the United Nations University (UNU), the Institute helps to build a bridge between the academic world and the United Nations. The UNU encompasses 16 research and training institutes and programmes in 12 countries around the world. UNU as a whole aims to develop sustainable solutions for pressing global problems of human survival and development.

UNU-FLORES develops strategies to resolve pressing challenges in the area of sustainable use and integrated management of environmental resources such as soil, water and waste. Focusing on the needs of the UN and its member states, particularly the developing and emerging countries, the institute engages in research, capacity development, advanced teaching and training as well as dissemination of knowledge. In all activities, UNU-FLORES advances a nexus approach to the sustainable management of environmental resources.
