

SCHEMA Seminar on Data and Policies for Improving Child and Women Health

Venue: UNU-IIGH Building, UKM Medical Centre, Jalan Yaacob Latiff, Bandar Tun Razak, Cheras, 56000 Kuala Lumpur

Date and time: Wednesday, 14 March 2018 from 10:30 a.m. to 12.00 p.m.

Contact: RSVP your attendance at this [Eventbrite webpage link](#)

The United Nations University International Institute for Global Health (UNU-IIGH) will host a public seminar on Wednesday, 14 March 2018 from 10:30 a.m. to 12.00 p.m. SCHEMA (“Systems Thinking and Place-Based Methods for Healthier Malaysian Cities”) alumni will present their work in Malaysia and the UK on child and women health. Lunch will be provided following the seminar.

The Power of Big Data for Informing Child Health Services

Professor Shantini Paranjothy, Cardiff University

Professor Paranjothy is the Scientific Lead for HealthWise Wales, a national initiative funded by health and Care Research Wales to engage large numbers of people in Wales with health and social care research. She is an expert in large-scale, long-term cohort studies for maternal and perinatal health.

Gender Responsiveness of NCD Policies

Dr. Arunah Chandran, Ministry of Health Malaysia

Dr. Chandran is a Maternal and Child Health Officer with experience in both clinical and public health settings, and is pursuing a doctoral degree in Epidemiology in University Malaya. Her current research involves examining reproductive characteristics and cardiovascular risks in women and their policy implications.

The SCHEMA project, funded by the British Council’s Newton-Ungku Omar Fund, seeks to motivate better decision-making for urban health and sustainability. SCHEMA advocates a holistic, social-ecological perspective on health and wellbeing.
