

HLPF Side Event

Carbon Neutrality & Social Transformation

Are We on Track to Arrive at a Justice-based Transition?

As the world faces the economic fallout and social disruption triggered by the COVID-19 pandemic, carbon neutrality has assumed greater urgency and the need to build back better is gaining increasing momentum.

This online side event of the 2021 High-Level Political Forum on Sustainable Development (HLPF) will explore the policies needed to achieve carbon neutrality by 2050, and the deep transformations required in our economic and social systems. It will look at how all sectors of society can address the challenges involved in realising such critical changes during the Decade of Action to deliver on the Sustainable Development Goals (SDGs).
