United Nations University objectives

The United Nations University (UNU) is an international community of scholars engaged in research, postgraduate teaching and capacity development, and dissemination of knowledge in furtherance of the purposes and principles of the Charter of the United Nations. The mission of UNU is to contribute, through research and capacity building, to solutions to the pressing global problems that are the concern of the United Nations and its Member States. For more information please visit http://unu.edu.

The United Nations University Institute on Globalization, Culture and Mobility (UNU-GCM) is one of several research and training institutes of the UNU. Based in Barcelona, it works to contribute to good governance, cultural diversity, democracy and human rights through a better understanding of cultural mobility and diversity in the context of globalization, focusing especially on the major cultural and social phenomena of migration and media. The institute fosters cutting-edge research in these areas at global and local levels. For more information please visit: http://gcm.unu.edu.
Context

*Migration and Cities*

Today, 54 per cent of the world’s population lives in urban areas, a proportion that is expected to increase to 66 per cent by 2050. Projections show that urbanization, combined with the overall growth of the world’s population, could add another 2.5 billion people to urban populations by 2050, with close to 90 per cent of the increase concentrated in Asia and Africa.

Cities, small and large, are at the forefront of receiving migrants. Cities are also made and remade by migration. In the imaginaries of many on the move, cities are spaces of opportunity and hope, where many seek to build new lives. They are also spaces where migrants may wait in transit, often for long periods of time. While cities have long been resilient to change, the current period is seeing the emergence of a range of new humanitarian challenges, particularly in a context where state policies are falling short and there is an increasing fragmentation in interests, policies and priorities. Cities as actors face the challenges of infrastructure and the provision of services for the numbers that arrive. Whilst many cities remain ill prepared to receive migrants, there are others that provide examples of good practice in innovative ways on a variety of fronts.

Building on the precedent of existing research and publications on migration and cities, UNU-GCM seeks a suitably qualified Programme Leader to further develop and enhance this area of expertise.

*Job Summary*
