Note to Readers

United Nations University Press publishes scholarly and policy-oriented books and periodicals on the issues facing the United Nations, its peoples and member states, with particular emphasis on the fields of peace & security, environment & urban issues, human rights, development, and international trade & economics.

UNU Press is the publishing arm of the United Nations University, an organ of the United Nations established by the General Assembly in 1972 to be an international community of scholars engaged in research, advanced training and the dissemination of knowledge related to the pressing global problems of human survival, development and welfare.

Complimentary policy and research briefs as well as sample book chapters are readily available. For more information, please visit <http://unu.edu/publications/unu-press>.

New Titles

“This well-timed book deserves a broad readership. It addresses a wide range of critically important governance issues relating to green economy transitions.”

—Henrik Selin, Boston University

“This is a book that must be read by everyone who still believes that the world can change its development patterns towards a more sustainable path.”

—Cristovam Buarque,

Senator of the Brazilian National Congress,
Head of the Rio+20 Senate Commission, Brazil, and
member of the United Nations University Council

Green Economy and Good Governance for Sustainable Development

Opportunities, Promises and Concerns

EDITED BY JOSE A. PUPPIM DE OLIVEIRA

Much of the debate on green growth and environmental governance tends to be general in nature, and is often conceptual or limited to single disciplines. Even though recent discussions on these topics have benefited from the accumulation of empirical and theoretical knowledge over the last few decades, these discussions have not produced the kind of conceptual novelty and tools necessary to place the notion of a green economy within mainstream political, social and economic agendas. Furthermore, discussions on governance remain mostly in the international sphere with merely tenuous talk on governance at the national and subnational levels – the levels at which implementation is key. The contributors to this book present the gap that can emerge between intentions and results when green initiatives are put into practice, and highlight the lack of discussion on important topics such as equity.

Green Economy and Good Governance for Sustainable Development takes stock of the achievements and obstacles towards sustainability over the last 20 years, and proposes new ideas and changes to create a more sustainable future.

Jose A. Puppim de Oliveira is Assistant Director and Senior Research Fellow at the United Nations University Institute of Advanced Studies, Japan.

Contents overview:

Introduction

Introduction: Framing the debate on the green economy and governance from different angles, Jose A. Puppim de Oliveira

Sustainable development: A changing paradigm, Sam Johnston

Part I: Green economy

Contributors: Manu V. Mathai, Govindan Parayil, Danielle Resnick, Finn Tarp, James Thurlow, Zinaida Fadeeva, Abel Barasa Atiti, Unnikrishnan Payyappallimana, Aurea Tanaka, Mario Tabucanon, Sachiko Yasuda, Kazuhiko Takemoto, Kaoru Ichikawa, Robert Blasiak, Aya Takatsuki, Timothy Afful-Koomson, Ingvar B. Fridleifsson, M. S. Suneetha and Alexandros Gasparatos

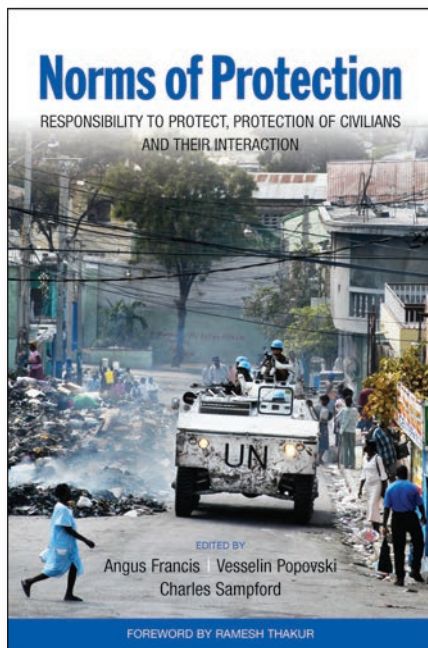

Part II: Governance

Contributors: Norichika Kanie, Marjo Vierros, Anne McDonald, Salvatore Arico, Kirsty Galloway McLean, Sam Johnston, Ameyali Ramos Castillo, Jamal Hisham Hashim, Zailina Hashim, Jose A. Puppim de Oliveira, Aki Suwa, Osman Balaban, Christopher N. H. Doll, Ping Jiang, Magali Dreyfus, Raquel Moreno-Peñaranda, Puspita Dirgahayani and Erin Kennedy

Conclusion

Key issues and lessons learned for moving towards a greener economy and creating better governance for sustainable development, Jose A. Puppim de Oliveira

New Titles

"This timely and important volume is a valuable contribution to the growing literature on R2P and how it relates to the earlier yet still developing doctrine of civilian protection. Confusion over which norm should apply under which circumstances has muddled strategy and practice. The authors surely have provided all essential parameters to start the debate, and the sooner we can clarify the doctrine, the sooner the norms of protection will become both policy and practice."

Norms of Protection

Responsibility to Protect, Protection of Civilians and Their Interaction

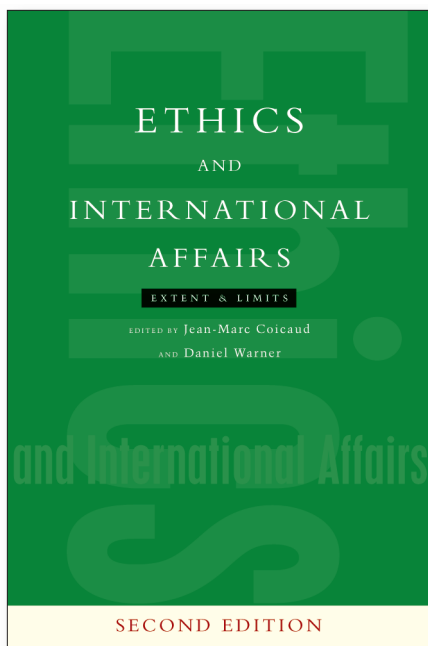

EDITED BY ANGUS FRANCIS, VESSELIN POPOVSKI AND CHARLES SAMPFORD

A series of humanitarian tragedies in the 1990s (Somalia, 1992–1994; Rwanda, 1994; Srebrenica, 1995; Kosovo, 1999) demonstrated the failure of the international community to protect civilians in the context of complex emergencies. These brought to life two norms of protection – Responsibility to Protect (R2P) and Protection of Civilians (POC) – both deeply rooted in the empathy that human beings have for the suffering of innocent people. The norms have achieved high-level endorsement: R2P from the 2005 World Summit Outcome document (Art. 138–140) and POC from a series of Security Council resolutions. The two norms of protection were instrumental in adopting Security Council Resolutions 1970 and 1973 (Libya), and 1975 (Côte d'Ivoire) in 2011. Both norms raise concerns of misinterpretation and misuse. They are developing – sometimes in parallel, sometimes diverging and sometimes converging – with varying degrees of institutionalization and acceptance. This process is likely to continue for some time with successes and failures enhancing or retarding that development. This book engages in a profound comparative analysis of the norms and aims to serve policymakers at various levels (national, regional and UN); practitioners with protective roles (force commanders, military trainers, strategists and humanitarian actors); academics and researchers (in international relations, law, political theory and ethics); civil society and R2P and POC advocates.

Angus Francis is Senior Lecturer and Program Leader, Human Rights and Governance Program in the Faculty of Law at Queensland University of Technology, Australia. **Vesselin Popovski** is Senior Academic Programme Officer and Head of Peace and Security at the United Nations University Institute for Sustainability and Peace, Japan. **Charles Sampford** is Foundation Dean, Professor of Law and Research and Professor of Ethics at Griffith University, and Director at the Institute for Ethics, Governance and Law, Australia.

Table of contents:

- Introduction, Angus Francis and Charles Sampford
- The responsibility to protect: Game change and regime change, Hugh Breakey
- The protection of civilians in armed conflict: Four concepts, Hugh Breakey
- The responsibility to protect and the protection of civilians in armed conflict: Overlap and contrast, Hugh Breakey
- The responsibility to protect and the protection of civilians: A view from the United Nations, Angus Francis and Vesselin Popovski
- A tale of two norms, Charles Sampford
- Peacekeeping, civilian protection mandates and the responsibility to protect, Hitoshi Nasu
- Enhancing protection of civilians through "responsibility to protect" preventive action, Andrew Garwood-Gowers
- Framing a protection service, Annie Herro and Kavitha Suthanthiraraj
- The relationship between international humanitarian law and responsibility to protect: From Solferino to Srebrenica, Helen Durham and Phoebe Wynn-Pope
- The responsibility to protect civilians from political violence: Locating necessity between the rule and its exception, Edwin Bikundo
- The responsibility to protect and the international refugee regime, Angus Francis
- Enhancing the capacities of state and regional institutions in transforming responsibility to protect from words to deeds: The case of Indonesia and ASEAN, Lina A. Alexandra
- Towards a "responsibility to provide": Cultivating an ethic of responsible sovereignty in Southeast Asia, See Seng Tan
- Interaction of the norms of protection, Vesselin Popovski

“This book will be particularly useful for students coming into the field of ethics in international relations. It introduces key ethical problems as they arise in connection with diplomacy, violence, international order, international law, human rights, feminist issues in world politics, refugees and globalization. The authors engage with these topics from a range of rival perspectives. It is not often that such an illustrious group of scholars in normative international relations theory are to be found presenting their positions in a single volume. Readers will come away from this collection intellectually excited and ethically committed to seeking out solutions to some hard ethical questions.”

—Mervyn Frost, Professor of International Relations,
Head of Department, War Studies,
King's College, London

ISBN 978-92-808-1225-1

Ethics and International Affairs

Extent and Limits
Second Edition

EDITED BY JEAN-MARC COICAUD AND DANIEL WARNER

Ethics and International Affairs explores the extent and limits of contemporary international ethics and examines the ways in which the international community has responded to some of the most crucial challenges since the end of the Cold War.

At the centre of the book is a discussion of how responsibility is viewed at individual, national and international levels when facing the problems of human rights, humanitarian intervention, environmental issues, considerations of gender, international economic justice, matters of war and peace and the plight of refugees. While some authors revisit the conception and interpretation of international ethics, others focus on the necessity to push for the better implementation and improvement of existing international norms.

The result is an examination of how ethics are defined in today's specific contexts and how an understanding of the ethical may be developed from the articulation of the dilemmas encountered.

The issues tackled in the book were already topical ten years ago, at the time of the first edition. In 2013, the year of publication for this second edition, following the tumultuous decade of the early 2000s, they have only gained in importance.

“A very welcome second edition with important new material, Coicaud and Warner's selections eschew ideal and abstract moral considerations in favour of practical reasoning and demonstrations of the actual penetration of ethical principles in international affairs. For those who want to know about operative ethical principles, instead of the fairy tale world of Rawlsian ideal theorising, and who want practical reasoning about how those principles might be elaborated, start here.”

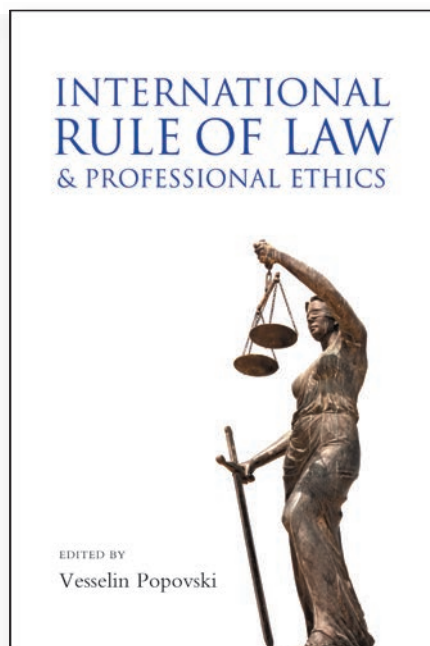

—Cornelia Navari, Professor of International Affairs, University of Buckingham, UK

Jean-Marc Coicaud is a Professor of Law and Global Affairs, and Director of the Division of Global Affairs at Rutgers University, USA. **Daniel Warner** is the Assistant Director for International Affairs at the Geneva Centre for the Democratic Control of Armed Forces, Switzerland.

Table of contents:

Introduction to the second edition: International ethics ten years later: Any progress?,
Jean-Marc Coicaud and Daniel Warner
International law as an approach to international ethics: A plea for a jurisprudential
diagnostics, Friedrich Kratochwil
The ethics of modern diplomacy, Roberto Toscano
Violence and ethics: Beyond the reason of state paradigm, Pierre Hassner
Justice and international order: The case of Bosnia and Kosovo, David Campbell
Ethics and international human rights, Jack Donnelly
Environmental ethics in international society, Oran R. Young
Ethics, feminism and international affairs, Kimberly Hutchings
Ethics and refugees, Mark Gibney
Does globalization have an ethical problem?, Ethan B. Kapstein
Conclusion: The task(s) of international ethics, Nicholas Rengger

New Titles

"The United Nations is the symbol of humanity's aspirations for a rules-based international order, whether this be in security, human rights or environmental governance. Just as the organization provides a platform where the weak and the powerful can interact on formally equal terms, so law mediates relations between unequals by acting as a constraint on capricious behaviour and setting limits on the arbitrary exercise of power. This admirable book traces the progressive internationalization of the rule of law, offering along the way intriguing insights into how various professions have helped to develop and implement international ethical standards."

International Rule of Law and Professional Ethics

EDITED BY VESSELIN POPOVSKI

The concept "rule of law" is well established in domestic constitutions and over many centuries has evolved to signify the supremacy of law above the rich and the powerful, above the potential arbitrariness or bias of human decisions.

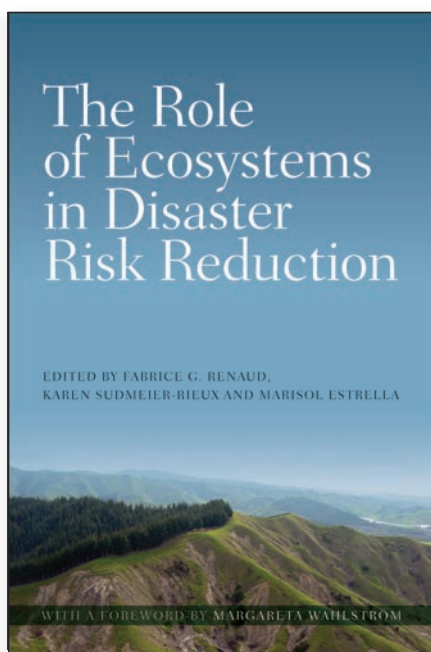

This book investigates the concept "international rule of law", which can be a problematic one as terms such as "international democracy", "international welfare" or "international freedom of speech" are not commonly used. International rule of law is defined as a process of recognition worldwide that law, both domestic and international, must be supreme and must remain detached from both power and bias. The authors argue that international rule of law is a gradual ascendance of law above power internationally, which can be illustrated in two ways: by global acceptance of the principles of rule of law and by repeated rulings of international tribunals, reaffirming that the supremacy of law places it above political, economic or other considerations. The book also examines how professional ethics, in particular the ethical behaviour of various groups of international employees, such as judges and prosecutors in international tribunals, diplomats and legal advisors, international civil servants and commissioners, can contribute to the development of the international rule of law.

"This book makes a strong case for the recognition of the importance of rule of law both in domestic law and courts, as well as the conception of international rule of law, where the international tribunals have been critically examined. This original volume recognizes the linkages between domestic and international rule of law and connects them with ethics and governance. The substantial contribution goes beyond the analysis of statutory law and develops a strong jurisprudential foundation for protecting the rule of law. It is written by scholars with outstanding records of publications, who significantly contributed to the advancement of knowledge in a number of related fields. This explains the authoritative nature and the intellectual rigour, the strong thematic framework and policy focus all throughout, which does not lose sight of the scholarly arguments that are essential in a book of this nature." —C. Raj Kumar, Vice Chancellor, O.P. Jindal Global University

Vesselin Popovski is Senior Academic Programme Officer and Head of Peace and Security at the United Nations University Institute for Sustainability and Peace, Japan.

Table of contents:

- Introduction: Ethical support for the rule of law, Vesselin Popovski
- "Thin theories" of the domestic and international rule of law, Charles Sampford
- "Unqualified human good" or a bit of "ruling class chatter": The rule of law at the national and international level, Simon Chesterman
- What is "international impartiality"? , Frédéric Mégret
- Reflections on the rule of law: Its significance for North and South as partners in development, John Barker
- Professions without borders: Global ethics and the international rule of law, Charles Sampford
- International civil service ethics, professionalism and the rule of law, Lorne Sossin and Vasuda Sinha
- Judicial ethics at the international criminal tribunals, William Schabas
- International rule of law? Ethics and impartiality of legal professionals in international criminal tribunals, Chandra Lekha Sriram
- Conclusions, Vesselin Popovski

The Role of Ecosystems in Disaster Risk Reduction

EDITED BY FABRICE G. RENAUD, KAREN SUDMEIER-RIEUX AND MARISOL ESTRELLA

The increasing worldwide trend in disasters, which will be aggravated by global environmental change (including climate change), urges us to implement new approaches to hazard mitigation, as well as exposure and vulnerability reduction. We are, however, faced with hard choices about hazard mitigation: should we continue to build dikes and walls to protect ourselves against floods and coastal hazards – though we have seen the limits of these – or should we consider alternative, ecosystem-based solutions? Ecosystem management is a well-tested solution to sustainable development that is being revisited because of its inherent “win-win” and “no-regrets” appeal to address rising disaster and climate change issues. It is one of the few approaches that can impact all elements of the disaster risk equation – mitigating hazards, reducing exposure, reducing vulnerabilities and increasing the resilience of exposed communities. Yet, the uptake of ecosystem-based approaches for disaster risk reduction (DRR) is slow despite some very good examples of success stories. Reasons for this are multiple: ecosystem management is rarely considered as part of the portfolio of DRR solutions because the environmental and disaster management communities typically work independently from each other; its contribution to DRR is highly undervalued compared to engineered solutions and thus not attributed appropriate budget allocations; finally, there are poor science–policy interactions on ecosystem-based DRR, which have led to unclear and sometimes contradictory scientific information on the role of ecosystems in DRR.

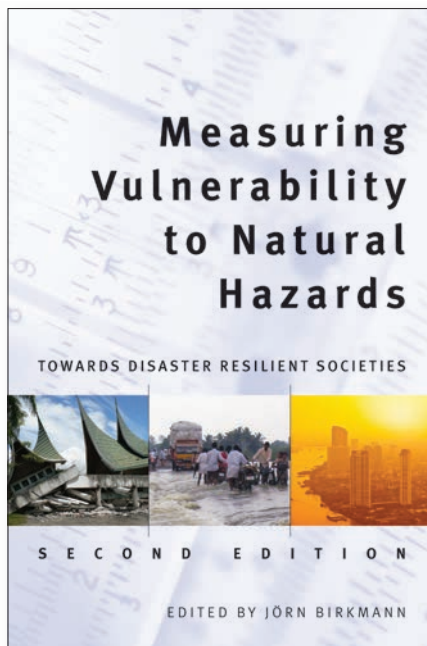

The aim of this book is to provide an overview of knowledge and practice in the multi-disciplinary field of ecosystem management and DRR to encourage and further develop dialogues between scientists, practitioners, policymakers and development planners.

Fabrice G. Renaud is Head of Section at the United Nations University Institute for Environment and Human Security, Germany. **Karen Sudmeier-Rieux** is a Researcher at the Center for Research of the Terrestrial Environment, University of Lausanne, Switzerland. **Marisol Estrella** is the Programme Coordinator of the Disaster Risk Reduction Unit, Post-Conflict and Disaster Management Branch, United Nations Environment Programme, Switzerland.

New Titles

“This completely revised book on measuring vulnerability to natural hazards, edited by Jörn Birkmann who has brought together more than 30 authors working in this field, is an excellent and very positive addition to the scientific literature on disaster risk reduction. The strategic connections with climate change adaptation are very timely and comprehensive. The focus on vulnerability and its assessment makes it highly relevant to scholars and also towards the development of strategic policy.”

Measuring Vulnerability to Natural Hazards

Towards Disaster Resilient Societies
Second Edition

EDITED BY JÖRN BIRKMANN

“Climate change adaptation”, “building resilience” and “vulnerability and risk reduction” are noble words, but do we really know what is meant by these terms and how to assess their respective progress? *Measuring Vulnerability to Natural Hazards* seeks to address these questions.

The world has recently experienced disasters of a magnitude rarely seen before: the cascading disaster in Japan, the earthquake in Haiti, and floods in Pakistan and Australia are a few prominent examples. These major disasters underline the fact that many communities and world regions are still vulnerable to extreme events and natural hazards. The dynamic and complex interaction between vulnerable communities, and climate- and non-climate-related, sudden-onset and creeping hazards very probably increases the risk of crises and disasters in the future.

Measuring Vulnerability to Natural Hazards is a completely revised, second edition of the popular book of the same title. Aside from being fully updated, this new edition includes the dimension of adaptation to climate change and new risks resulting from climate change. The text provides and combines practical examples from Africa, Asia, the Americas and Europe with theoretical and conceptual frameworks. It is key reading for all those interested in improving risk reduction and adaptation strategies to extreme events and gradual changes in the context of climate change and natural hazards. Measuring vulnerability and evaluating adaptation are essential prerequisites to strengthen the capacities of communities in building resilience through knowledge-based approaches.

Jörn Birkmann is Academic Officer and Head of the Vulnerability Assessment, Risk Management and Adaptive Planning Section at the United Nations University Institute for Environment and Human Security, Germany, and Visiting Adjunct Professor at the Department of Geography, University of Bonn. He is IPCC Lead Author for the IPCC Special Report Managing the Risk of Extreme Events and Disasters to Advance Climate Change Adaptation and Lead Author for the IPCC Fifth Assessment Report.

Contents overview:

Part I: Basic principles and theoretical basis

Jörn Birkmann

Part II: Vulnerability and environmental change

Contributors: Fabrice Renaud, Roger S. Pulwarty, James Verdin, Marcel Kok and Jill Jäger

Part III: Global, national and subnational assessment approaches

Contributors: Mark Pelling, Pascal Peduzzi, Maxx Dilley, Torsten Welle, Jörn Birkmann, Dunja Krause, Dora C. Suarez, Neysa J. Setiadi, Jan Wolfertz, Omar D. Cardona, Martha L. Carreño, Stefan Greiving, Susan L. Cutter, Daniel P. Morath, Robert B. Kiunsi, Meshack V. Minoris, Stefan Schneiderbauer, Marc Zebisch, Steve Kass and Lydia Pedoth

Part IV: Local vulnerability assessment

Contributors: Christina Bollin, Ria Hidajat, Stefan Kienberger, Juan Carlos Villagrán de León and Ben Wisner

Part V: Institutional capacities, public sector vulnerability and dynamics of vulnerability

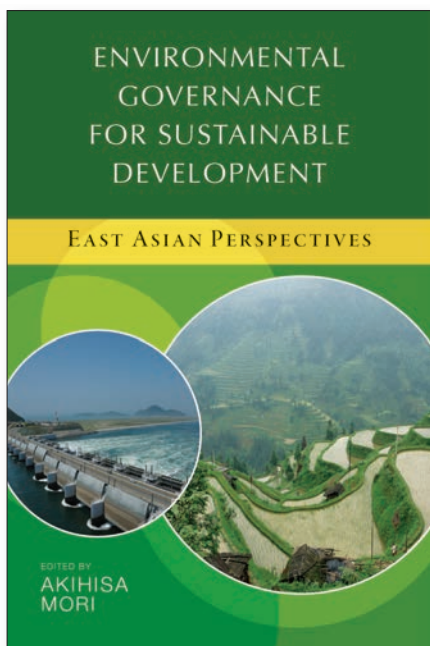

Contributors: Louis Lebel, Elena Nikitina, Vladimir Kotov, Jesse Manuta, Stefan Hochrainer, Reinhard Mechler, Georg Pflug, Jörn Birkmann, Matthias Garschagen, Nishara Fernando, Vo Van Tuan, Anthony Oliver-Smith and Siri Hettige

Conclusion

Comparative glossary

Katharina Marre

“East Asia is turning into a key region in the world, in terms of both accelerating environmental problems and innovative environmental reform. This very timely and up-to-date volume contains in-depth analyses of the successes and challenges of contemporary environmental governance in various East Asian countries and on multiple topics. Through a large number of detailed and fascinating studies, from multiple perspectives, a unique understanding is offered on how national, regional and international policies, strategies and measures contribute to sustainable development.”

Environmental Governance for Sustainable Development

East Asian Perspectives

EDITED BY AKIHISA MORI

In order to advance global sustainable development it is indispensable to change the course and mode of conventional economic growth in the East Asian region, which has enjoyed rapid economic growth but faces environmental challenges.

This volume gives attention to the evolution of multilevel environmental governance in the East Asian region, including both Northeast and Southeast Asia. It examines how effective emerging environmental governance and policy has been and addresses the underlying causes of local, national, regional and global environmental challenges. Topical chapters include those on democratization and its effect on decision-making processes, international environmental aid, economic analysis of carbon reduction policy, regional and global environmental regimes and subsequent new financial mechanisms, and hybrid systems of environmental governance that emphasize the role of the private sector and civil society in contributing to environmental governance.

Special attention is also given to the regional economic and environmental regimes. The volume examines the advantages, challenges and solutions in addressing local, national, regional and global environmental challenges, and in changing the course of economic growth.

Akihisa Mori is an Associate Professor of the Graduate School of Global Environmental Studies, Kyoto University, Japan.

Contents overview:

Part I: Environmental governance for sustainable development in the East Asian region

Akihisa Mori

Part II: Domestic pressures for national environmental governance

Contributors:

Hoi Seong Jong, Taewook Huh, Akihisa Mori, Shin'ya Koyama, Yoshihisa Inada and Mitsuru Shimoda

Part III: International assistance for local environmental governance

Contributors:

Li Chun Chen, Akiko Furuya, Akihisa Mori, Takasei Kusube and Yoshihisa Inada

Part IV: Regional approaches to economic integration and environmental governance

Contributors:

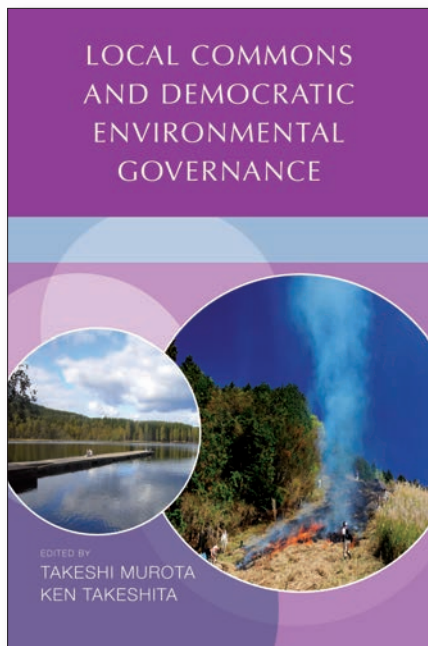

Akihisa Mori, Kazuki Takeshi, Hikari Ban, and Kiyoshi Fujikawa

Part V: Hybrid Systems in Environmental Governance

Contributors:

Seonghee Kim, Akihisa Mori, Ying Sun, Tetsuhiko Miyadera, Tsuyoshi Fujita and Tadashi Hayashi

Local Commons and Democratic Environmental Governance

EDITED BY TAKESHI MUROTA AND KEN TAKESHITA

The rising tide of globalization poses a direct threat to the viability of small communities worldwide. Such communities, however, are our greatest hope for sustainable environmental governance, as they possess unparalleled ability to directly manage common-pool resources.

Providing a much-needed antidote in this age of globalization, this volume advances the idea of collaborative governance as an integration of open and closed commons. Taking into consideration the dimension of conflict resolution, it studies examples of governance structures in various countries around the world to develop a new type of democracy towards multilevel environmental governance that involves the public, private and commons spheres.

With contributions from researchers in a wide variety of disciplines, this volume demonstrates through institutional and empirical analyses the essential role of local commons in providing an axis of resistance to increasing environmental devastation and social inequality towards creating a sustainable future for local communities as well as society at large.

Takeshi Murota is a Professor in the Department of Economics at Doshisha University, Japan. **Ken Takeshita** is a Professor of Legal Philosophy in the Law School at Kansai University, Japan.

Contents overview:

Part I: Theoretical studies of the commons

Contributors: Yutaka Suga, Makoto Inoue and Gaku Mitsumata

Part II: Institution of the commons

Contributors: Tatsuya Suzuki, Takeshi Murota, Izuru Ota and Shimpei Iwasaki

Part III: Local commons and survival strategies under globalization

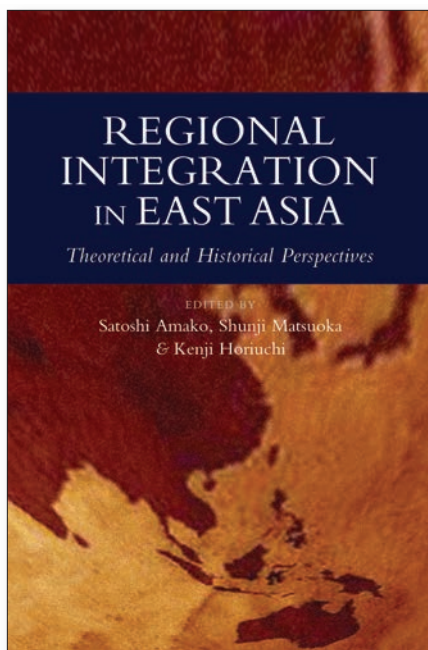

Contributors: Hiroshi Noda, Rui Izumi, Yuichiro Hirano, Daisaku Shimada, Takeshi Murota, Haruo Saito, Toshio Meguro and Yasuhiro Nakanishi

Part IV: Collaboration, democracy and multilevel environmental governance

Contributors: Ken Takeshita, Shinji Yamamoto, Yoshio Takatsu, Tomohiko Ohno and Congmian Jiao

Conclusion

Building common property regimes to deter resource-wrecking, Margaret A. McKean

“This is an excellent book on regional integration in East Asia. Well-known experts have given a better understanding of this complex and evolving process through multiple perspectives and disciplines on the history, theory and practice of regional integration. I strongly recommend this book to scholars, students and policymakers interested in East Asian affairs.”

—Surin Pitsuwan,
Secretary-General of the Association
of Southeast Asian Nations (ASEAN)

March 2013

Regional Integration in East Asia

Theoretical and Historical Perspectives

EDITED BY SATOSHI AMAKO, SHUNJI MATSUOKA AND KENJI HORIUCHI

Asian regional integration has shown remarkable progress since the end of the 1990s, but is currently at a major crossroads amid confusion of debate over the direction and effectiveness of integration, and friction brought about by the “rise of China”. Meanwhile, the changing balance of power among nations, the rise of non-state actors, the “internationalization of internal problems” and the “internalization of international problems”, are rendering the cross-national structure of Asia increasingly complex and multilayered. Signs of instability of the global economy are growing and environmental and resource challenges are deepening. The Asian region needs new approaches to understanding the state of regional integration and mechanisms to address the challenges.

Regional Integration in East Asia is the culmination of five years of intensive research on Asian regional integration by Waseda University. It re-examines theoretical approaches to comprehending the actual state of integration in the region and presents the most compelling among them. It also examines the state of regional cooperation in Asia in areas ranging from the economy to energy and the environment, security and education. In addition, the book offers long-term historical perspectives, including especially those of Japan, ASEAN and China, on Asian regional integration. Thus, it sheds light on diverse aspects, levels of analysis and time spans, and offers a comprehensive portrayal of the actual condition of Asia and the state of endeavours to build regional cooperation and institutions. This volume will open a new research frontier in Asian regional integration.

Satoshi Amako is a Professor at the Graduate School of Asia-Pacific Studies, Waseda University, Japan. **Shunji Matsuoka** is a Professor at the Graduate School of Asia-Pacific Studies, Waseda University, Japan. **Kenji Horiuchi** is a Research Fellow at the Waseda University Institute of Asia-Pacific Studies, Japan.

Table of contents:

Part I: Theoretical perspectives on Asian regional integration

- Asia and regional integration theory: Between a regional complex and a regional society, Yoshinobu Yamamoto
- Norms and regional institutions: Towards an East Asian community, Hiro Katsumata
- East Asian integration and domestic politics, Jemma Kim
- Institutional approaches to Asian regional integration, Shunji Matsuoka
- The GIARI model of Asian regional integration studies and its meaning, Satoshi Amako

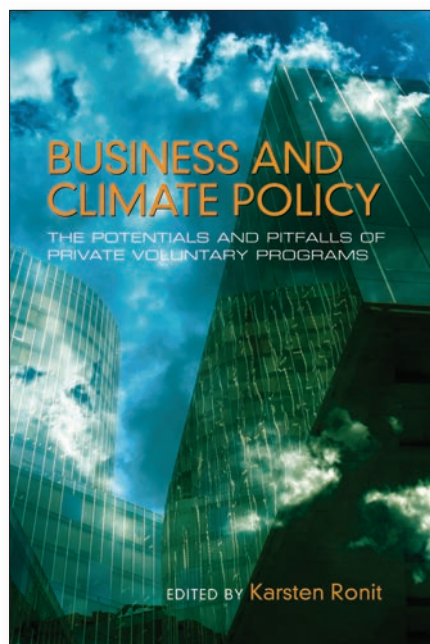

Part II: Issues in Asian regional integration

- Globalization and regional economic integration in East Asia, Shujiro Urata
- Energy and environmental institutions in East Asia, Kenji Horiuchi, Reishi Matsumoto and Katsuya Tanaka
- The rise and fall of the debate over East Asian multilateral regional security cooperation, Chikako Kawakatsu Ueki
- Regional integration and cooperation in higher education in Asia, Kazuo Kuroda

Part III: Historicizing Asian regional integration

- Between civilization and anti-civilization: The ideology and activism of early Asianists, Naoyuki Umemori
- Japan and pan-Asianism: Lost opportunities, Seiko Mimaki
- Southeast Asia in the post-war period: The origins and crossroads of Bandung, non-alignment and ASEAN, Sachiko Hirakawa
- From Asia-Africa and Asia-Pacific to Asia: China's multilateral cooperation in Asia, Rumi Aoyama

June 2012

Business and Climate Policy

The Potentials and Pitfalls of Private Voluntary Programs

EDITED BY KARSTEN RONIT

Climate change has become one of the most important and challenging global policy fields. Attention has primarily focused on the successes and failures of states and inter-governmental organizations but many more actors are involved and contribute to solutions. Business, often seen as spurring climate change, harbours a lot of potential for problem solving. Today, a rich variety of private voluntary programs address climate change.

Private voluntary programs are *private* in the sense that they are initiated by and made up of businesses, *voluntary* in the sense that businesses are free to join or leave them, and *programs* in that a variety of formal rules, resources and bodies are often established to administer and evaluate the schemes.

Business and Climate Policy assesses the potentials and pitfalls of existing private voluntary programs. The contributors evaluate how effectively different programs meet public and private goals at the national and international levels, and across industries. The lessons learned presented in this book can help to design new programs and improve those in existence. Such lessons learned are relevant not only within climate policy, but also within the many other policy fields in which private voluntary programs are active.

Karsten Ronit is an Associate Professor in the Department of Political Science, University of Copenhagen, Denmark.

Table of contents:

Part I: Introduction

Marrying climate policy and private voluntary programs, Karsten Ronit

Part II: Cross-sectoral and multisectoral programs

Private voluntary programs in environmental governance: Climate change and the financial sector, Jennifer Clapp and Jason Thistlethwaite

Private voluntary programs on climate change: US federal government as the sponsoring actor, Lily Hsueh and Aseem Prakash

Part III: Sectors

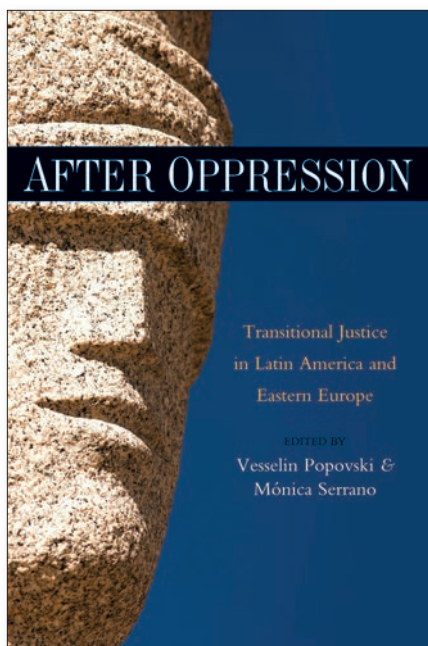

The role of private voluntary climate programs affecting forests: Assessing their direct and intersecting effects, Laura Bozzi, Benjamin Cashore, Kelly Levin and Constance McDermott

Emerging private voluntary programs and climate change: The blind spots of the agrifood sector, Doris Fuchs and Frederike Boll

Climate change, private voluntary programs and the automobile industry, Tony Porter

Part IV: Conclusions

Private voluntary programs in climate policy: Potentials and pitfalls, Karsten Ronit

"Latin America and Eastern Europe emerged from dictatorship more or less contemporaneously in the 1980s and '90s. The contrast in the ways they reckoned with their respective legacies of human rights violations has been a theme of the emerging field of 'transitional justice' ever since. With the benefit of a quarter century of experience, *After Oppression* presents the most comprehensive comparative study of those similarities and differences. Editors Mónica Serrano and Vesselin Popovski have assembled a most impressive group of scholars and practitioners to conduct this essential study. They combine intellectual rigor with 'you-are-there' proximity to the challenges, frustrations and signal successes of the struggle for justice in our time."

—Juan E. Méndez,
UN Special Rapporteur on Torture and
Other Cruel, Inhuman or Degrading Treatment
or Punishment, and Visiting Professor,
Washington College of Law

After Oppression

Transitional Justice in Latin America and Eastern Europe

EDITED BY VESSELIN POPOVSKI AND MÓNICA SERRANO

The decline of authoritarianism in Latin America and Eastern Europe marked the end of a dark chapter in the history of these societies. In both regions, transition to democracy was accompanied by distinct efforts to come to terms with the traumatic experiences of the past and to demand accountability from the oppressors. The impact of these efforts rippled far beyond national boundaries, expanding the frontiers of international justice and yielding indelible lessons and inspiration. As these societies crossed the uncharted waters of transition and liberalization, one difficult question remained: How can the need for democratic stability in the present and future be reconciled with the imperative of truth and justice for the past? This was an unprecedented test: societies made their way forward often through trial and error, steps ahead were followed by steps back. *After Oppression* enquires into the effectiveness of various accountability mechanisms and argues that while there are many different paths to truth and justice, all depend on continued efforts in order to reach them. In many cases these efforts also create favourable conditions for the development of a resilient human rights culture. This book demonstrates that democratic consolidation and accountability for past human rights violations are closely related, if independent, processes.

Contents overview:

Introduction

Transitional justice across continents, Vesselin Popovski and Mónica Serrano

Models of accountability and the effectiveness of transitional justice, Kathryn Sikkink

Part I: Latin America

Contributors: Pilar Domingo, Catalina Smulovitz, James L. Cavallaro, Fernando

Delgado, Claudio Fuentes, Elvira María Restrepo, Ricardo Córdova Macías, Nayelly Loya Marín, Carmen Rosa de León Escribano, María Patricia González Chávez and Carlos Basombrío Iglesias

Part II: Eastern Europe

Contributors: Ernesto Kiza, Hristo Hristov, Alexander Kashumov, Gerhard Werle, Moritz

Vormbaum, Monika Nalepa, Lavinia Stan, Nadya Nedelsky, Mitja Steinbacher, Matjaž Steinbacher and Matej Steinbacher

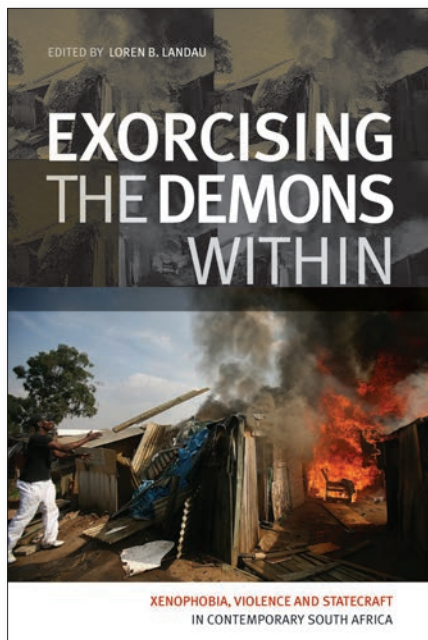

Conclusions

Transitional justice: Reframing the debate, Alexandra Barahona de Brito and Laurence Whitehead

Transitional justice and democratic consolidation, Mónica Serrano

The complexity and effectiveness of transitional justice in Latin America and Eastern Europe, Vesselin Popovski

New Titles

"By placing the demons within both migration and violent citizenship and in a longer historical perspective, this book succeeds in surpassing current interpretations of the 2008 violence against immigrants in the townships as just resulting from xenophobia. The authors masterfully show that the politics of statecraft – notably the African National Congress' (ANC) language of multi-cultural dominance – inspired a fatal depoliticisation of difference. The very coherence of this collection offers a challenging analysis of struggle over belonging and denial of difference that is of much broader relevance than South Africa alone."

Exorcising the Demons Within

Xenophobia, Violence and Statecraft in Contemporary South Africa

EDITED BY LOREN B. LANDAU

On 11 May 2008, residents of Alexandra Township near Johannesburg turned violently on their neighbours, launching a string of attacks that, two weeks later, left 60 dead, dozens raped and over a hundred thousand displaced. Most of those killed were from beyond South Africa's borders, but at least a third were citizens who, for reasons of ethnicity or political affiliation, failed to protect their space in the country's urban core. Although not the most severe political violence in South Africa's turbulent past, the 2008 attacks reflect an important moment in the country's post-apartheid, post-authoritarian existence: a moment when the government's legitimacy and the post-apartheid order were called into question. This xenophobic violence made evident cracks in the cohesion of law and society while helping to redefine both.

It is these events and subsequent consequences for the ordering of power, population and place that this book explores. *Exorcising the Demons Within* makes sense of recent anti-outsider violence by situating it within an extended history of South African statecraft that both produced the conditions for the attacks and has been reshaped by it. Drawing on an interdisciplinary team of expert scholars and on new research, this is the first academic text to fully theorise the events that made global headlines in 2008.

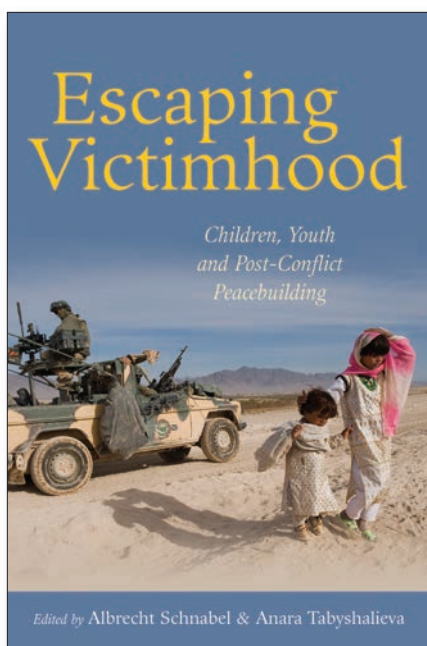

"This book is critical of the policies, practices and politics of containment that continue to frame belonging in post-apartheid South Africa in an era of flexible mobility. The dominant logic of ever diminishing circles of inclusion informed by hierarchies of humanity within and between states is productive of the sort of narrow articulation of belonging that easily results in the rationalisation of difference, demonisation, xenophobia and violence such as that of May 2008 – the key event that ties together this richly crafted, well documented and empirically grounded collection of essays."

—Francis B. Nyamnjoh, Department of Sociology, University of Cape Town

Loren B. Landau is Director of the African Centre for Migration & Society at the University of the Witwatersrand, South Africa.

Table of contents:

- Introducing the demons, Loren B. Landau
- Media memory: A critical reconstruction of the May 2008 violence, Tamlyn Monson and Rebeca Arian
- People, space and politics: An exploration of factors explaining the 2008 anti-foreigner violence in South Africa, Christine Fauvele-Aymar and Aurelia Segatti
- Disorder in a changing society: Authority and the micro-politics of violence, Jean Pierre Misago
- Xenophobia's local genesis: Historical constructions of insiders and the politics of exclusion in Alexandra Township, Noor Niefertgodien
- Citizenship, xenophobic violence and the law's dark side, Jonathan Klaaren
- Taking out the trash? A "garbage can" model of immigration policing, Darshan Vigneswaran
- Making the law; breaking the law; taking the law into our own hands: Sovereignty and territorial control in three South African settlements, Tamlyn Monson
- From defending migrant rights to new political subjectivities: Gauteng migrants' organisations after May 2008, Tara Polzer and Aurelia Segatti
- Postscript: Positive values and the politics of outsidership, Loren B. Landau

"This volume, focusing on children and youth in post-conflict situations, takes a very wide angled view, including chapters on Europe, Asia, the Middle East and Africa. Taking a case study approach the volume attempts to situate local conflicts and their effects on children and youth within an international peacebuilding and security context. The volume attempts to assert a sense of agency on the part of children and youth rather than perpetuating the idea of this group as a vulnerable population and victims of conflict."

Escaping Victimhood

Children, Youth and Post-Conflict Peacebuilding

EDITED BY ALBRECHT SCHNABEL AND ANARA TABYSHALIEVA

In the aftermath of violent conflict, no society can afford to rebuild its future without the participation of its young generation and consideration for their interests and needs. Yet, trapped in a state of protracted victimhood, children and youth – and their needs and potential – risk being overlooked in the planning and implementation of post-conflict peacebuilding. Their voices will not be heard unless they can escape the chains of victimhood and their agency in post-war recovery effort is recognized.

By drawing on experiences from post-conflict environments in different parts of the world, a diverse group of researchers and scholar-practitioners working in academia, and non-governmental and international organizations examine the proactive roles of girls and boys in promoting security for themselves and their families; their disproportionate suffering and their specific vulnerabilities during and after the war; international legal frameworks created to protect and empower children and youth in post-conflict environments; examples of initiatives to help young people escape the traps of victimhood and voicelessness and actively engage in rebuilding their communities and nations; and international and national efforts to provide for the security of children and young people in post-conflict environments.

As the young post-war generation will become the next leaders, parents and teachers, ensuring children and youth's active role in post-conflict peacebuilding today could be among the most effective means of building a sustainable peace tomorrow.

Albrecht Schnabel is a Senior Fellow in the Research Division of the Geneva Centre for the Democratic Control of Armed Forces, Switzerland. **Anara Tabyshalieva** is an Assistant Professor of History at Marshall University, USA, and a Research Fellow at the Institute for Regional Studies, Kyrgyzstan.

Contents overview:

Introduction: Conceptualizing the roles of children and youth roles in post-conflict peacebuilding

Friend or Foe? Dominant Party Systems in Southern Africa

Insights from the Developing World

EDITED BY NICOLA DE JAGER AND PIERRE DU TOIT

Within southern Africa, there is an observable increase in dominant party systems, in which one political party dominates over a prolonged period of time, within a democratic system with regular elections. This party system has replaced the one-party system that dominated Africa's political landscape after the first wave of liberations in the 1950s and 1960s. This book seeks to understand this trend and its implications for southern Africa's democracies by comparing such systems in southern Africa with others in the developing world (such as India, South Korea and Taiwan). In particular, the case of Zimbabwe stands out as a concerning example of the direction a dominant party can take: regression into authoritarianism. India, South Korea and Taiwan present alternative routes for the dominant party system. The salient question posed by this book is: Which route are Botswana, Namibia and South Africa taking? It answers by drawing conclusions to determine whether these countries are moving towards liberal democracy, authoritarianism or a road in between.

Nicola de Jager is a lecturer in the Department of Political Science, University of Stellenbosch, South Africa. **Pierre du Toit** teaches in the Department of Political Science, University of Stellenbosch, South Africa.

Table of contents:

Part I: Theoretical Foundations

Introduction, Nicola de Jager and Pierre du Toit

Part II: Insights from the developing world

The political costs of privatisation: Why democratic and authoritarian dominant parties meet their doom, Kenneth F. Greene

The dominant party system and democracy: The Congress Party in India, Thiven Reddy

Transitioning from a dominant party system to multi-party system: The case of South Korea, Joseph Wong

From authoritarianism to nascent democracy in Taiwan: Electoral elements of the Kuomintang-dominant regime, Yun-han Chu and Chung-li Wu

Part III: Dominant party systems in southern Africa

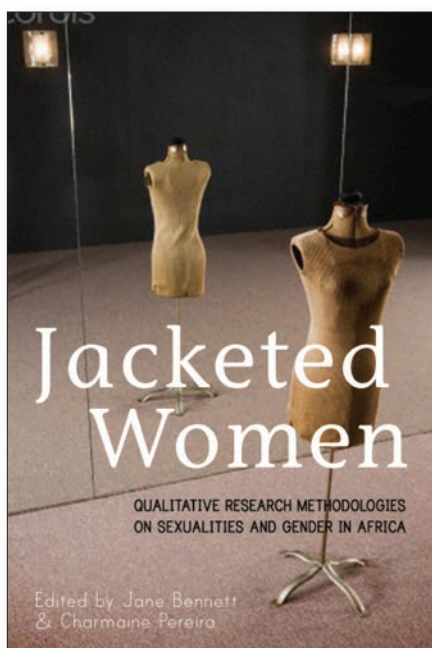

Interrogating the dominant party system in Botswana, David Sebudubudu and Mokganedi Zara Botlhomilwe

The politics and resource endowment of party dominance in Namibia: The past as the present and the future?, Andre du Pisani

South Africa: A democracy in the balance, Nicola de Jager

Heroes fall, oppressors rise: Democratic decay & authoritarianism in Zimbabwe, Annemie Britz and Josephat Tshuma

Conclusion: Resources and the politics of dominant party systems, Pierre du Toit and Nicola de Jager

"An invaluable and timely resource in the ways that it tackles conceptual and practical issues that most texts on methodology overlook or purposely ignore. It is a very welcome addition to the still young and growing scholarship on African feminist epistemologies and methods as well as African sexualities."

Jacketed Women

Qualitative Research Methodologies on Sexualities and Gender in Africa

EDITED BY JANE BENNETT AND CHARMAINE PEREIRA

In 2004, the African Gender Institute ran a continental research project, Mapping Sexualities, among the objectives of which was the development of a research methodology suited to carrying out in-depth case studies of the dynamics of gender and contemporary sexual cultures in Ghana, Nigeria, South Africa and Uganda.

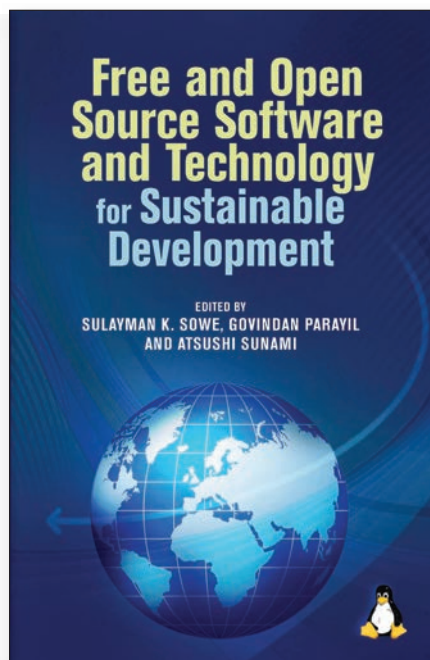

This book is the result of this research. The chapters cover broad-ranging issues and include questions about what it means to research topics that are unpopular or fraught with the sense of the taboo that underpins much work in sexualities and gender studies. Overall, the diverse pieces within the collection offer the opportunity to see qualitative research not as the "poor cousin" of quantitative studies but as a zone which raises intellectual and political challenges.

Jane Bennett is an Associate Professor and the Director of the African Gender Institute based at the University of Cape Town, South Africa. **Charmaine Pereira** teaches in the Sociology Department of Ahmadu Bello University, Nigeria.

Table of contents:

- Jacketed women: Questions of African feminism, sexualities and the politics of qualitative research methodologies, Jane Bennett and Charmaine Pereira
- Challenging research, researching challenges: Feminism and activism in Lesotho, Karabo Mohlakoana
- "An opportunity for knowing": Researching the sexual politics of *zina* in northern Nigeria, Charmaine Pereira
- Developing principles for research on young women and abortion through an analysis of difficulties in current studies, Catriona McLeod
- Researching discourses on widow heritance: feminist questions about "talk" as methodology, Awino Okech
- From respectable to questionable: Women's narratives of marital relations and sexual restriction in widowhood in Harare, Zimbabwe, Rekopantswe Mate
- "They respect you more": Meanings of marriage for four South African lesbian couples in Cape Town, Jessica Scott
- The politics of researching gender and sexuality in African contexts, Jane Bennett
- Conclusion

Free and Open Source Software and Technology for Sustainable Development

EDITED BY SULAYMAN K. SOWE, GOVINDAN PARAYIL AND ATSUSHI SUNAMI

Free and open source software (FOSS) technologies transcend geographical and cultural boundaries to usher in a new paradigm where volunteers collaboratively develop software for the commons. The political economy of FOSS technologies has far-reaching implications because of the centrality of information and communications technologies for development (ICT4D). The global trend in the diffusion and adoption of FOSS technologies is a testimony to the socio-economic and technological impact the software has for both developed and developing economies. While FOSS development, education and business potentials may appear as a phenomenon for the developed world, a sizable number of developing countries have undertaken bold measures to bring about innovation, sustainable ICT development and technology independence. The book aims to raise awareness, increase the deployment and capture the impacts of FOSS for sustainable development.

Sulayman K. Sowe is a JSPS-UNU Fellow in the Science and Technology for Sustainable Societies Programme at the United Nations University Institute of Advanced Studies, Japan. **Govindan Parayil** is Vice-Rector of the United Nations University and Director of the United Nations University Institute of Advanced Studies, Japan. **Atsushi Sunami** is Associate Professor at the National Graduate Institute for Policy Studies, Japan.

Table of contents:

Introduction, Sulayman K. Sowe, Govindan Parayil and Atsushi Sunami

Part I: FOSS research, theory, technology adoption and practice

Making sustainable open source software infrastructures by federating and learning in the global context, Gianluca Miscione

Innovative tools for sustainable agriculture in developing countries: The impact of open source biotechnology, Ademola A. Adenle and Obijiofor Aginam

FOSS as a driver: Perspectives from the ICT development agenda, Tomonari Takeuchi

A participatory service learning process for FOSS-based solidarity projects, David Franquesa, David López, Leandro Navarro and Fermín Sánchez

Open source software migration: Capturing best practices using process reference models, Onkgopotse Molefe and Thomas Fogwill

Exploring FOSS opportunities in natural hazard risk assessment and disaster management, Coley Zephenia

Open source software adoption best practices: Myths, realities, processes and economic growth, Carlo Daffara

Language data as a foundation for developing countries: The ANLoc 100 African Locales, Martin Benjamin

Part II: FOSS case studies, surveys, policy development and experience reports

The open source ecosystem in Tunisia: An empirical study, Imed Hammouda

Adoption and diffusion patterns of FOSS in Jamaican SMEs: A study of perceptions, attitudes and barriers, Maurice McNaughton, Sheryl Thompson and Evan W. Duggan

Development NGOs as potential groups for expansion of FOSS: The case of Iran, Saeid Nouri Neshat, Parvin Pakzadmanesh, Mehdi Almasi and Mohammad Amin Ameri

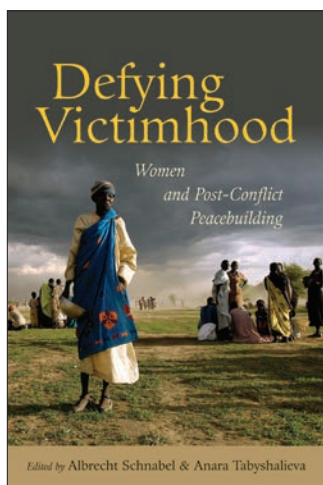

Improving public healthcare systems in developing countries using FOSS: The EHAS Foundation case, Carlos Rey-Moreno, Inés Bebea-González, Ignacio Prieto-Egido, Seth Cochran, Ignacio Foche-Pérez, Jose García-Muñoz, Andrés Martínez-Fernández and Javier Simó-Reigadas

FOSS in school communities: An experience report from Peace Corps volunteers in Ghana, Caroline Hardin

Part III: Conclusion

Gender-Based Explosions

The Nexus between Muslim
Masculinities, Jihadist Islamism
and Terrorism

MALEEHA ASLAM

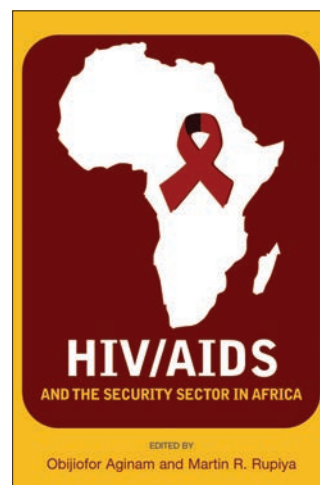

With a foreword by Vesselin Popovski

"This well-researched and morally engaged book is an important contribution to gender studies and to understanding the contemporary Muslim world. Maleeha Aslam has conducted careful and imaginative research, and has a powerful argument on the relevance of masculinity dynamics to Islamist militancy. Some of the findings are troubling; but by moving beyond the clichés of both Western 'security' thinking and conventional militancy, to a concern with the making of masculinities and the possibilities of change, this book offers a message of hope."

HIV/AIDS and the Security Sector in Africa

EDITED BY OBJIOFOR AGINAM
AND MARTIN R. RUPIYA

HIV/AIDS and the Security Sector in Africa explores the dynamics of how the security sector of selected African states has responded, or is currently responding, to the complex and multi-faceted challenges of HIV/AIDS. The chapters are written by African practitioners including, in some cases, commissioned officers who are currently serving in the armed forces, medical officers and nurses working in the military and African policy and academic experts. While this volume does not comprehensively address all aspects of the impact of HIV/AIDS on the security sector, the contributors nonetheless highlight the potentials and limits of existing HIV/AIDS policies in Africa's security sector.

Just Transitions

Explorations of Sustainability in an Unfair World

MARK SWILLING AND EVE ANNECKE

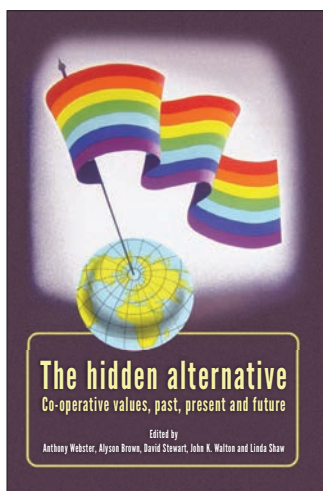

*Harold and Margaret Sprout Award
Runner-up, 2013*

"*Just Transitions* does what few others even attempt—namely, redefine global environmental politics in a way commensurate with the nature of the problem, the speed and extent of current changes, and the urgency of transition."

—Harold and Margaret Sprout
Award Committee

Current economic growth strategies around the world are rapidly depleting the natural resources and eco-system services that we depend on. *Just Transitions* gives a comprehensive overview of these global challenges from a global South perspective. How do developing countries eradicate poverty via economic development, while at the same time encountering the consequences of global warming and dwindling levels of cheap oil, productive soils, metals, clean water supplies and forest products? How do they address widening inequalities in income as well as the need to rebuild ecosystem services and natural resources?

Public Works and Social Protection in Sub-Saharan Africa

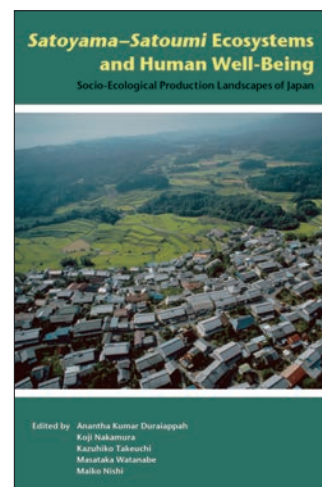

Do Public Works Work for the Poor?

ANNA MCCORD

Public works programmes (PWP) are widely implemented throughout Asia, Latin America and Africa, often with funding from major international donor agencies. They are perceived to present a "win-win" policy option, providing employment to the chronically poor while also creating assets for the state, and in this way offering a welfare transfer which is also a tangible economic investment.

The prevailing view among donors and government agencies with responsibility for social protection is that PWPs are preferable to other measures to assist unemployed people living in chronic poverty. But is this view in fact correct? This book critically explores the concept of the PWP and interrogates its social protection performance in the context of chronic poverty.

Satoyama-Satoumi Ecosystems and Human Well-Being

Socio-Ecological Production Landscapes of Japan

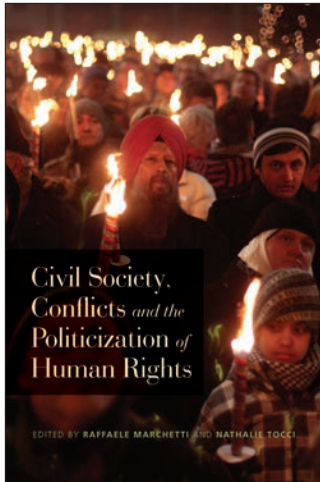

EDITED BY ANANTHA KUMAR DURAIAPPAH,
KOJI NAKAMURA, KAZUHIKO TAKEUCHI,
MASATAKA WATANABE AND MAIKO NISHI

Satoyama is a Japanese term which describes mosaic landscapes of different types of ecosystem – secondary forests, farm lands, irrigation ponds and grasslands – along with human settlements managed to produce bundles of ecosystem services for human well-being. The concept of satoyama, long-standing traditions associated with land management practices that allow sustainable use of natural resources, has been extended to cover marine and coastal ecosystems – satoumi. These landscapes and seascapes have been rapidly changing and the ecosystem services they provide are under threat due to various social, economic, political and technological factors.

Satoyama-Satoumi Ecosystems and Human Well-Being presents the findings of the Japan Satoyama Satoumi Assessment (JSSA) – a study of the interaction between humans and satoyama-satoumi ecosystems in Japan.

Achieving Global Sustainability

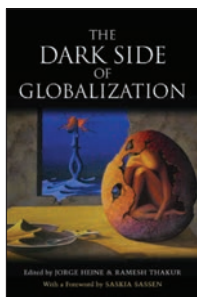

Policy Recommendations

EDITED BY TAKAMITSU SAWA,
SUSUMU IAI AND SEIJI IKKATAI

The problem of global sustainability is indisputably the most serious issue facing humanity today. One of the biggest factors in the deterioration of global sustainability is climate change, which has been exacerbated by the entire range of human activities and is inextricably related to modern civilization. Solving this difficult problem requires a drastic redesign of society from all aspects – technological, economic and social. This book looks at how to achieve a more secure level of global sustainability and gathers together a variety of recommendations.

ADD SHIPPING AND HANDLING FEES _____

TOTAL _____

United Nations
University Press

TOKYO • NEW YORK • PARIS

**When ordering from UNU Press,
please note:**

Shipping and Handling

For domestic (Japan-based) orders, add 500 yen for the first book and 300 yen for each additional book. For international orders, add US\$12.00 for the first book and US\$6.00 for each additional book. Special shipping and handling rates are available for bulk orders.

Discounted prices are available for customers in developing countries. Please contact UNU Press for details.

Payment can be made by bank transfer in US dollars or Japanese yen or by credit card (MasterCard/Visa). Credit card payments will be charged in Japanese yen.

To ensure secure credit card transactions, please do not send credit card details by e-mail.

Payment must be received before an order can be shipped.

All prices and availability dates are subject to change without notice.

Policies

Prices, Discounts, Special Shipping and Handling

All prices are quoted in US dollars. Prices are subject to change without notice. Special shipping instructions can usually be accommodated and these will be charged on an individual basis. Discounts are offered to wholesalers, retailers and agents. Please contact us for more information (sales@unu.edu).

Claims

All claims for shortages or damaged items and requests for proof of delivery must be made within 30 days of receipt. Claims regarding payments and non-receipt of orders must be made within 30 days of receipt of invoice.

All claims must be submitted by fax: (81) 3 3406 7345 or e-mail: sales@unu.edu

Examination Copies

UNU Press is pleased to provide complimentary examination (review) copies of any title in our catalogue for consideration for course adoption. Please contact us directly for further details (sales@unu.edu). All requests should contain information about the institution making the request, the name of the person teaching the course, the name of the course and date of commencement, and the expected number of copies required should a book be adopted. In addition, we require the name of the bookstore that would place the order should a title be adopted.

Please allow approximately two weeks for processing and delivery. All requests are subject to availability and approval.

Media Review Copies

Complimentary review copies are made available upon request at the discretion of UNU Press. However, we require details of any review to be published in the initial request and we request a copy of all reviews be sent to us either prior to or upon publication. Please send to:
